

“I thought being pregnant at age 35 was going to be my biggest risk.”

Huntington resident Mary Catherine Santa

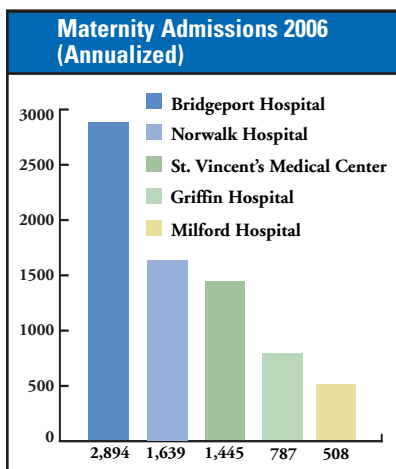

Huntington residents Ed and Mary Catherine Santa with Cate, Charlie and Claire

“Then we learned that I have a genetic condition that can cause pregnancy complications and miscarriages!”

Depending on a woman’s needs, high-risk pregnancy specialists in The Birthplace at Bridgeport Hospital use sophisticated technology to provide Antenatal Testing, Genetic Counseling, a Diabetes-of-Pregnancy Program and other sophisticated services that make Bridgeport Hospital a regional referral center for births.

“With the help of the experts at Bridgeport Hospital, we had three healthy babies by the time I reached 40!”

With high-tech expertise and a tender touch, neonatologists and Newborn Intensive Care Unit teams at Bridgeport Hospital have been saving tiny premature babies since 1970.

For a referral to an expert Bridgeport Hospital physician, please call 1-888-357-2396.
