

“On April 8, 2006, in the middle of training for a half marathon, I died.”

Stratford resident Robert C. Skelly

“Paramedics revived me and brought me to Bridgeport Hospital. After having angioplasty and an ICD/pacemaker implanted, I went home on April 14.”

Bridgeport Hospital offers leading-edge technology that includes minimally invasive and off-pump open-heart surgery, the mini-maze procedure, ICDs including biventricular devices, advanced diagnostics including intravascular ultrasound (IVUS), and more.

“On April 15, I was back at the office. The week of June 17, after four weeks of cardiac rehabilitation, I jogged 14 miles.”

The dedicated team at Bridgeport Hospital includes expert invasive and non-invasive cardiologists, internationally known cardiothoracic and vascular surgeons, and highly skilled electrophysiologists, cardiovascular anesthesiologists and emergency physicians.
